Work Experience

Food & Beverage Attendant, Melbourne Hospitality Roles 2023 – Present | Melbourne

- Served as a first point of contact for customers in high-volume environments.
 - Managed customer enquiries and resolved issues professionally.
 - Processed payments and maintained accurate transaction records.
 - Coordinated with team members to ensure smooth daily operations.
- Maintained professional presentation standards and customer service excellence.

Customer Service Executive (Remote), Home Easy Inc., USA 2023 | Remote

- Managed customer enquiries through phone, email, and online communication platforms.
- Maintained accurate client records and digital documentation.
- Scheduled follow-ups and coordinated communication between clients and internal teams.
- Resolved customer concerns professionally and escalated issues when required.
- Worked with multiple digital systems while maintaining high levels of accuracy and professionalism.

Project Experience

AI Business Knowledge Assistant (Current Project)

Technologies: Python, Streamlit, OpenAI API, Prompt Engineering

- Developing an AI-powered Business Knowledge Assistant that enables users to upload PDF documents and retrieve information through natural language queries.
- Integrating OpenAI APIs with Python to generate context-aware responses based on document content.
- Building an interactive Streamlit interface to support document analysis and knowledge retrieval.
- Applying prompt engineering and document processing techniques to improve response quality and user experience.
- Exploring practical applications of AI for business knowledge management and workflow efficiency.

AR E-Commerce Try-On Prototype

- Designed an AR retail try-on prototype in Figma to simulate product previews and reduce purchase uncertainty, potentially improving online customer confidence based on UX research insights.
- Conducted UX and competitor analysis of AR retail technologies to identify usability gaps and design improved product exploration flows, improving user experience and website navigation.
- Supported website content management activities including page updates, plugin configuration, and content maintenance.

Food Waste Reduction App Proposal

- Designed a reservation-based digital platform concept connecting cafés with customers to reduce surplus food waste, potentially lowering unsold inventory waste for small cafés.
- Designed system architecture and database concepts to support reservation management and improve operational efficiency.

CONFERENCE PRESENTATIONS & RESEARCH CONTRIBUTIONS

- Conference for Quality & Innovation in Higher Education (2024)
- International Conference on Integration of Social Sciences (2024) — Principal researcher contribution
- International Conference on Educational Leadership & Policy (2023)
- International Conference on Inclusive Education (2023)

These experiences strengthened analytical research, communication, and stakeholder engagement skills applicable to technology design and implementation
